

END-TO-END SOLUTION

Mainlink provides a flexible end-to-end solution for water and heating industries that can be easily combined with existing infrastructure or platforms already in use by utility companies

Cloud platform utilizing smart tech aimed at secure data processing and implementation of automatization

Complete carrier-grade LoRa based network for communication with meters, built and managed without requiring significant investments

Most innovative ultrasonic smart water and heat meters, provided on a Hardware-as-a-Service basis

THE BENEFITS OF END-TO-END SOLUTION

LESS ADMINISTRATION

NO NEED FOR 3RD PARTY FINANCING (OPEX)

WARRANTY AND FLEXIBILITY

Mainhive is a flexible next generation Cloud IoT platform. It contains data collection and storage, data visualization, analytics and End-user mobile application.

MAINHIVE FEATURES

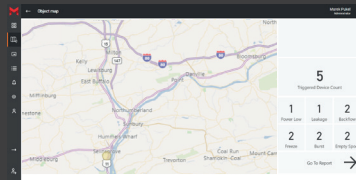

DASHBOARDS

Quick overview of the most important metrics of the resources

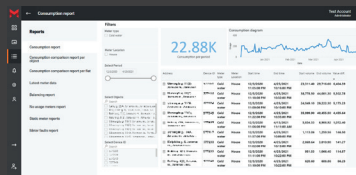

MAP VIEW

Resource and status monitoring on the map

Consumption report:

Consumption data of the selected object, period or meter

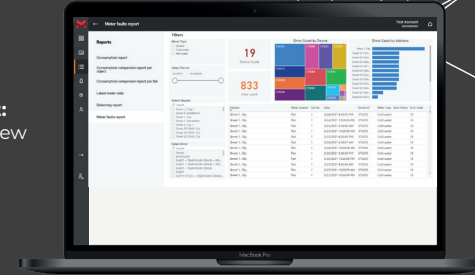

Balancing report:

Introductory and individual meters consumption comparison report for Non-Revenue-Water detection

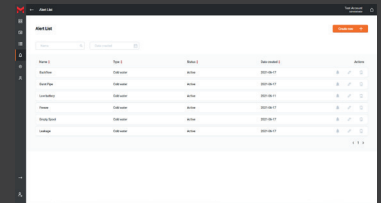

Meter event report:

Meter events overview report

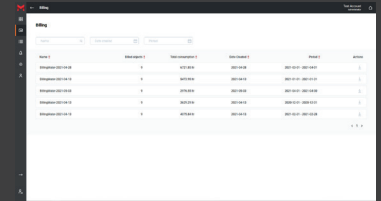

CUSTOMIZABLE ALERTS

Easy to set up alert notifications with customizable conditions

AUTOMATED BILLING

Automated billing for invoicing. Increases accuracy and eliminates manual work

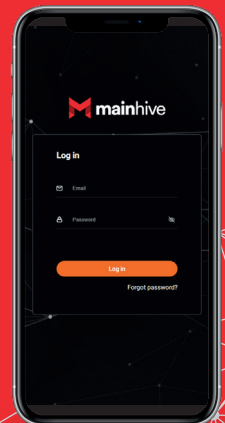

MOBILE APP

Use Mainhive on mobile device or tablet. Download the Mainhive app from Google Play or Apple Store

END-USER APP

Application dedicated for end-users with water consumption monitoring and sustainable water usage features

OUR VALUE
